

STUDIO ART | SPRING 2022

## My Mother's MRI: Brain-Mind Dataset

By Tony Errichetti

"As a girl, on Sundays I'd walk all the way from South Philadelphia up to the art museum.

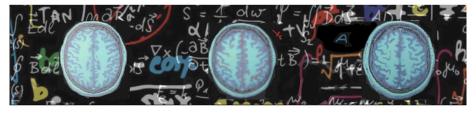

I loved art and wanted to be an artist in those days."

Lifetime guilt for asking my brother to cross a busy street to mail a letter, and who was then run down by a distracted, grief-stricken mother whose little boy had just died in a hospital from a car accident.

"At my lowest point I saw Jesus and his Sacred Heart. He pointed to his heart and said, 'See my heart, Frances? It's wounded, like yours. Have faith in me.' "

Blues singer, storyteller, ruminator, magical thinker, dreamer, my dream interpreter.
